

SLOVENSKÁ SPOLOČNOSŤ

PRE GEOMETRIU A GRAFIKU

Information to all interested party in the field of

GEOMETRY and COMPUTER GRAPHICS

A new scientific society SSGG had been found and registered on May 13, 2002, at the Ministry of Interior of Slovak Republic.

SSGG is a non-profit organisation and expenses connected with its activities are covered by membership dues, officials support and institute sponsorships.

SSGG will be an institution to inform on organisation of different scientific events related to geometry and computer graphics.

SSGG will provide a platform for donations and sponsorship of scientific workers in the related fields (especially young ones) in order to stimulate scientific development in these disciplines and to enhance the quality of geometry and graphics education of engineers and designers particularly.

Society will publish a scientific journal for geometry.

All other activities dealing with dissemination of knowledge in the fields of geometry and graphics are welcome, discussion forum on Internet, software market, workshops, Internet courses and chats, etc., and can be provided within the scope of society activities.

Slovak Society for Geometry and Graphics is a collective member of ISGG - International Society for Geometry and Graphics

The objective of the society is to foster international collaboration and stimulate scientific research and teaching methodology in the fields of geometry and computer graphics.
